Believe Campaign for Cause and Interest in Constitution Brought Out Many

Complete registration figures obtained yesterday gave greatest satisto the Republican leaders. Democratic politicians would not admit that they were displeased with the unexpectedly large totals. The final figres showed a much larger number of persons who have indicated their desire to vote this year than the leaders had been led to expect from the outward interest shown in the campaign up to

1911, an increase of 48,908. On the other hand, it is over 90,000 less than last year. But the interest in the gubernatorial race was responsible for the big registration then, and much more of a slump was expected this year. more of a slump was expected this year.

The belief was expressed in some quarters last night that the activity of the women on behalf of the suffrage amendment might in a measure account for the unexpectedly large registration. It might be better to speak of it as an absence of the slump that had been predicted, due to general apathy on political matters at the present time. Unquestionably many women have been responsible for the registration of men who otherwise would have let it go.

a loss of 10,000 in the Democratic districts is not at all significant. There has beer a falling off in the registration figures in lower Manhattan for years, due to the tearing down of residences, tenement and apartment houses to make way for loft buildings. The voters are moving to upper Manhattan or to the outlying districts, but, wherever they go, they will vote the Democratic ticket. So there is no loss to the party. The indications are that the entire Democratic ticket will win."
